Education

Reva University

Master in Computer Application

Bangalore, India

Dec 2022 - Sep 2024

Experience

Techoriginator

Dec 2024 - Present

Junior App Developer

Varanasi, India

- Worked as a Flutter Developer on a multi-screen service management app, delivering a smooth user experience across image/video-based forms.
- Implemented Provider for state management, improving app performance and code scalability by 40%.
- Integrated Google Maps and Places Autocomplete for location-based features, enhancing usability in real-time service workflows
- Collaborated closely with UI/UX team to develop responsive designs, ensuring smooth compatibility across Android and iOS devices.
- Performed API integration for service data management, increasing efficiency in backend communication by 25%.
- Troubleshoot build and deployment issues, speeding up the CI/CD pipeline and reducing build errors.

JMTECHNEX

Jan. 2024 - Nov. 2024

Web Developer Intern

Remote

- Contributed to the development and maintenance of responsive web pages using HTML, CSS and JavaScript, ensuring cross-browser compatibility and mobile-friendly design.
- Worked closely with the development team to integrate RESTful APIs, debug UI issues, and enhance user experience on live client projects.

Projects

Medflash (Insurance Claim App)

Cross-Platform Insurance Claim App with Admin Panel

Flutter, Dart, PHP

Developed a full-featured Insurance Claim App using Flutter, enabling users to easily submit and track insurance claims through a streamlined mobile interface. Designed a comprehensive admin panel to monitor and manage claimant data, including claim statuses, user profiles, and document verification. Integrated multi-company claim routing to automatically or manually assign claims to the appropriate insurance providers. Implemented role-based access control for users, admins, and company representatives to ensure secure and efficient operations.

My Mobile Shop- IOS

iOS Mobile Shop App with Admin Panel and APIs

Flutter, Dart, Php

Developed a mobile shop iOS application that enables users to seamlessly browse, compare, and purchase mobile phones. Implemented key features such as product listings, detailed specifications, price filtering, and cart management to enhance the overall shopping experience. Designed a custom admin panel to manage products, orders, and inventory with real-time updates. Utilized PHP with MySQL to build secure RESTful APIs for efficient backend operations and smooth data handling. Integrated order tracking, user authentication, and payment gateway support to deliver a complete mobile e-commerce solution.

Skills

Programming Languages: Dart, PHP, SQL (MySQL)

Other Languages: HTML, CSS, Bootstrap

Frameworks: Flutter

Developer Tools: Git, Firebase, Figma, Canva, Postman

Libraries: Provider
