## CAREER OBJECTIVE

Passionate MCA graduate with hands-on experience in frontend and backend technologies like React, Golang with Echo framework, and PostgreSQL. Seeking a full-time opportunity to grow as a backend or full-stack developer while solving real-world problems.

## SKILLS

- Languages: JavaScript, Golang, C, C++
- Frontend: React.js, Next.js, Tailwind CSS, HTML, CSS
- Backend: Golang (Echo Framework), Node.js (Basic)
- Database: PostgreSQL, MongoDB (Basic)
- Tools: Git & GitHub (Push/Pull/Branch), Postman, VS Code
- Concepts: REST APIs, Microservices (Basics)

## PROJECTS

### E-Learning App

 Backend: [GitHub](https://github.com/Irfanlam123/E-learning-api) |  Frontend (UI): [GitHub](https://github.com/Irfanlam123/E\_Learning)

 Backend: Golang, Echo, PostgreSQL | Frontend: React Native, CSS

An e-learning platform with a powerful backend and intuitive mobile frontend.

- Backend provides RESTful APIs for course management, user registration/login, and secure authentication.
- Frontend is built using React Native with a clean and responsive UI for learners to browse and enroll in courses.

### Divyadarshanm

Online Puja Booking App (Frontend)

 [GitHub](https://github.com/Irfanlam123/DivyaDarhsanm) |  React.js, Tailwind CSS

A spiritual puja booking application built using React and Tailwind CSS.

- Users can book various pujas from anywhere in India through a simple and responsive interface.
- UI is optimized for smooth user experience, with clean design and intuitive navigation.
- Backend development is in progress to handle order, payment, and scheduling functionality.
